VIDEO INSTRUCTIONS

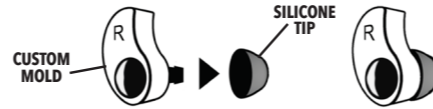

For best results follow video instructions at www.decibullz.com/earphone-instructions

1

ASSEMBLY

Attach correct size silicone tips to Thermo Fit Molds. Medium tips work for most people.

You can change the tips after the molding process is complete. Check that the tip is securely attached before inserting into your ear. If the tip becomes dislodged in the ear canal, seek medical attention.

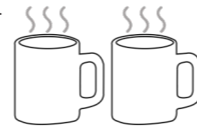

2

HEAT

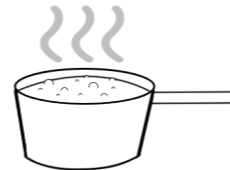

MICROWAVE

If using the microwave, fill two glass or ceramic cups with 3 to 4 inches of water and bring to a boil. DO NOT PLACE THE MOLD IN THE MICROWAVE WITH THE WATER AND DO NOT USE PAPER, PLASTIC, OR STYROFOAM CUPS.

STOVE TOP OR KETTLE

If using the stove top or kettle, boil water, remove from heat and fill each cup with 3 to 4 inches of hot water.

3

Place ONE mold in each cup. Multiple molds WILL stick together if heated at the same time.

Let molds sit in the hot water for 5 minutes.

4

Remove the mold with a metal spoon and let cool for 30 seconds.

CAUTION: ITEMS MAY BE VERY HOT.

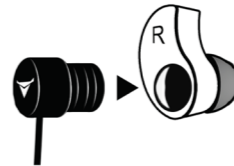

Be sure to use a metal spoon, the mold WILL stick to plastic.

5

SHAPE

Insert the earphone into the back of the mold and place the mold into your ear.

6

Firmly press the back of the earphone making sure the silicone tip fits into the ear canal.

7

With the pad of your finger, press the mold to fill the concha (bowl) of your ear.

If the molding material is not fully softened or you feel the center of the mold is still firm, reheat the mold in hot water.

8

Let the mold cool for 5 minutes before removing. Repeat the process with the other ear.

Excessive heat can deform the earplugs. Do not leave in a hot car, direct sunlight, or anywhere with excessive heat.

REMOLDING

To re-mold, remove the earphone, place the mold back in boiling water for 5 minutes, then repeat steps 4-7.

WARNINGS AND SAFETY INSTRUCTIONS

- Heed all warnings. Use only as directed.
- Your Decibullz have an acoustic seal, listening levels will be perceived as louder. Insert your Decibullz and set the volume low and increase as needed.
- The acoustic seal created by Decibullz will block out external noise. Use of Decibullz while operating a vehicle, bicycling, or jogging may be dangerous.
- Do not tamper with your Decibullz product.
- Exposing Decibullz to temperatures above 150° F will cause them to melt.
- Do not leave Decibullz in direct sunlight for an extended period of time.

ENJOY YOUR DECIBULLZ!

WARNING!

The molding process involves heating your molds and forming them to your ears.

DO NOT PLACE THE MOLD INTO YOUR EAR WHILE IT IS HOT.

Wait until the mold is warm and pliable.

Permanent hearing loss may result from long-term exposure to sound at high volumes. Use as low a volume as possible.

CAUTION: CHOKING HAZARD

Keep away from children. Parts are nontoxic but may interfere with breathing if caught in windpipe.

CONTOUR ES CONTROL GUIDE

MUSIC

+/- VOLUME

Increase volume - press the + button.
Decrease volume - press the - button.

▶▶ PLAY OR PAUSE A SONG OR VIDEO

Press the multi-function button (MFB) once.
Press again to resume playback.

⏭ SKIP TO THE NEXT SONG OR CHAPTER

Press the MFB twice quickly.
